The screenshot shows the AutoCAD 2007 software interface. The main workspace displays a 3D perspective view of a building facade with various architectural details like windows and doors. A red circle is drawn on one of the facade elements. To the right, there is a 2D floor plan view of the same building, showing a grid of rooms. The bottom status bar indicates the current layer is '0' and the view is '3D'. The top menu bar includes 'File', 'Edit', 'View', 'Tools', 'Format', 'Window', and 'Help'.
